

## Voice, Video, and Access Control Remote Monitoring Service

For years, CCTV systems have been good at recording what happened; they have been less effective at preventing incidents.

By combining live voice communication with your video system, we create a real physical presence on your property and a powerful deterrent to criminal or inappropriate activity.

Integrator Support utilizes a UL-Listed, state-of-the-art command center providing interactive video monitoring. IS services are available across a wide range of vertical markets including commercial real estate, corporate and educational campuses, manufacturing, logistics, health care, and residential communities.

Our unique service model consists of teams of highly trained, professional, well-spoken agents who know how to handle a wide range of situations. Our approach is to diffuse, not escalate. Our command center is staffed with agents and managers to ensure your procedures are followed precisely.
