- Photo recall (*manual & automatic*)
- Flexible WAV file to event attachment capabilities
- Upgrade path from Series 9000
- Powerful report capabilities
- Flexible grouping of alarm inputs and relays for monitoring and control
- System tree offers easy overview and modification of system configuration

# IDentiPASS

FAST, RELIABLE, AND EASY TO HANDLE!

Whatever your business, whatever your security needs, there's now one access control system that's a perfect fit. IDentiPASS is IDenticard's newest and most powerful access system, designed to adapt to your organization's unique security requirements . . . with the lightning speed of Microsoft Windows NT®.

IDentiPASS is the ideal choice for facilities of every size, from small independent businesses to Fortune 500 companies. Its 32-bit operating system provides a truly secure environment for schools, colleges, hospitals, government agencies and similar organizations that are seeking to link security communications in a vast, ever-changing network.

**IDentiPASS™**  
PREMIER ACCESS SECURITY SYSTEM

*The IDentiPASS access control system is backed by a fully-trained technical staff at IDenticard's headquarters and a network of professional partners throughout North America.*

# IDentiPASS

THE POWER TO SIMPLIFY YOUR WORLD.

With IDentiPASS, you can control the access to doors and parking gates for a single building or in a worldwide network. Individual access, from 200 to 200,000 employees, may be user-defined for tailoring the system to your exact monitoring requirements.

IDentiPASS features easy-to-read, customized displays and windows to monitor activity. Simplified floor plan graphics and sophisticated flexible WAV files that link sounds to particular events immediately identify what has occurred anywhere within the system.

The advanced networking capabilities of IDentiPASS provide more options for system monitoring, as well as control and database maintenance from multiple locations. Unique multitasking capabilities allow you to use the same PC that operates your security program to run spreadsheets, word processing, or other programs with clear, readable commands.

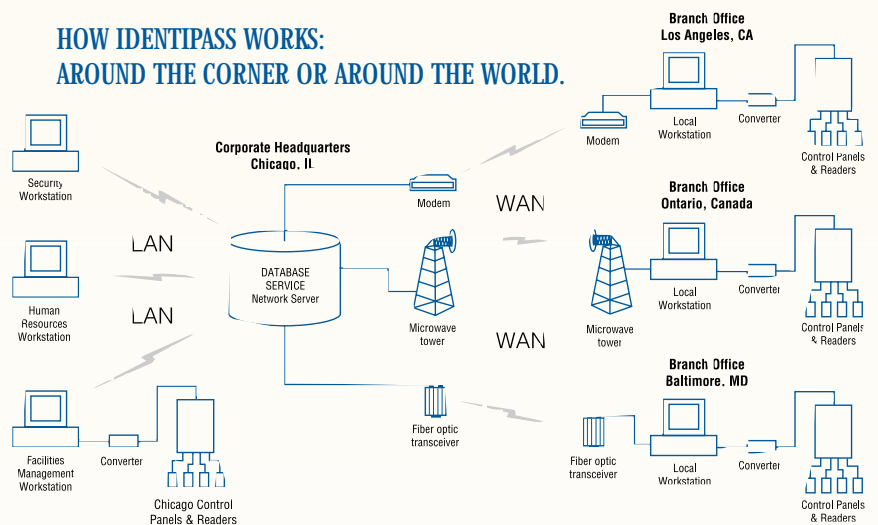

From basic stand-alone security to the most advanced, integrated network, IDentiPASS is the ideal access system solution for today and the future.

*Clear, easy-to-read commands simplify programming and database maintenance.*

## HOW IDENTIPASS WORKS: AROUND THE CORNER OR AROUND THE WORLD.

# IDenticard

THE EXPERIENCED LEADER  
IN THE WORLD OF SECURITY.

Considering the rapidly evolving state of security technology, selecting the right access control system can be an intimidating task. Will the system you invest in today meet the expanding security demands of your business well into the future? And how well does it integrate with your other security ID systems?

For answers to questions like these, customers throughout the world are choosing IDenticard as their single-solution security identification resource. Quite simply, there is no other security company in the industry that can match our fully-integrated line of photo ID, video imaging, and access control products. With nearly three decades of experience in the security industry, IDenticard is a name you can trust for innovative, dependable products.

We design all of our products with the flexibility to accommodate your present needs and to upgrade easily as your security demands grow. And most importantly, all of our ID systems can be seamlessly integrated for total security management.

There are many solutions to your security management needs. But for total integration and the convenience of a single source provider, there's only one name you need to remember for access control – IDenticard.
